

FIS COMMODITY RISK MANAGER

Commodity Trading, Procurement and Risk Management – With Valuation and, Accounting

Firms operating in the commodities and energy markets know that effective risk management is crucial in an era of volatile markets, complex instruments and stringent regulations.

To compete and win, you need a risk management platform that scales with changing needs, simplifies business-critical processes and ensures regulatory compliance. You also require a solution that optimizes operational efficiencies and provides clear insights into the value chain – while being fast and cost-effective to deploy.

FIS® Commodity Risk Manager is a comprehensive commodity trading, procurement and risk management solution. Offered in a Software-as-a-Service (SaaS) model, the application is purpose-built for firms that manage risk in the commodities and energy markets.

The cloud-based solution delivers real-time trade capture, independent valuation, procurement, risk management, and accounting – all in a single solution. So, you get visibility into risk and performance as well as a rapid return on investment.

CONQUER COMMODITY RISK

Get the tools you need for clear visibility into commodities performance and risk.

ACT ON ACCURATE INSIGHTS

Access extensive valuation, accounting and risk analytics for more accurate insights and a transparent view of commodities and FX exposure as well as intraday mark to market.
