

UK Potential New Bank Gets Set for Success with FIS' Preconfigured Risk Solution

A U.K. potential new bank entrance has chosen FIS® to deliver an out-of-the-box but flexible framework for balance sheet and capital management.

As it prepares to launch in 2022, the firm was looking for sophisticated and powerful systems that it could set up rapidly to help optimize the balance sheet and deliver accurate, reliable calculations of risk-weighted assets.

Preconfigured to meet the firm's specific risk and regulatory needs under dynamic scenarios, FIS Balance Sheet Manager Select and FIS Capital Manager Select provide a fast and cost-effective answer. As well as being quick and easy to set up, they are hosted and maintained by FIS as part of a fully managed cloud service.

Both Select solutions are built on FIS' mature, scalable platform for balance sheet management, which was recently named bank ALM system of the year in the Risk Technology Awards and best provider of functionality and coverage by Celent. What better foundation to support a new bank's innovative business model and ambitious growth plans?
